## Drive selection chart

**S0 modules**

**EP modules**

**PC modules**

**A0 modules**

### Main attributes

Widest available power and voltage range in the industry; Customizable with Adaptive Programming and optional Control Builder; Easy to start up

Drive module and system components mounted on a back panel; space-efficient multilevel panel; easy to maintain; easy to specify and install

Pre-engineered UL Listed cabinet drives; top entry and exit; reactor included; expertly engineered

Pre-engineered cabinet drives; wide variety of configurations and options; built to UL specifications

### HP range

5 to 3250 HP at 480 Vac

10 - 600 HP at 480 Vac

10 - 500 HP at 480 Vac

600 - 3000 HP at 480 Vac

### Voltage range

240 to 1200 Vdc

240 to 500 Vdc

240 to 500 Vdc

480 to 1200 Vdc

### Enclosure type

UL type Open (IP00)

UL type Open (IP00)

NEMA type 1  
NEMA type 12 filtered

IP21 (NEMA type 1)  
IP42 (NEMA type 12 filtered)

### Control mode

N/A

N/A

N/A

N/A

### Connectivity options

Profibus DP, CANopen, DeviceNet, Ethernet IP, Modbus TCP, Modbus RTU, EtherCat, ControlNet, ProfiNet

Profibus DP, CANopen, DeviceNet, Ethernet IP, Modbus TCP, Modbus RTU, EtherCat, ControlNet, ProfiNet

Profibus DP, CANopen, DeviceNet, Ethernet IP, Modbus TCP, Modbus RTU, EtherCat, ControlNet, ProfiNet

Profibus DP, CANopen, DeviceNet, Ethernet IP, Modbus TCP, Modbus RTU, EtherCat, ControlNet, ProfiNet

### Operator interface

Local or door mounted LCD display and keypad; DriveWindow Light PC Software included

Local or remote mounted LCD display and keypad; DriveWindow Light PC Software included

Door mounted LCD display and keypad; DriveWindow Light PC Software included

Local or remote mounted LCD display and keypad; DriveWindow Light PC Software included

# DCS800-S0, industrial drives

## ABB DC industrial drives

The DCS800 DC industrial drive from ABB combines a powerful controller with a thyristor power platform that has been proven in factories all over the world. The DCS800 boasts a wider power range than any other DC drive on the market. The hardware and software are designed with you, the user in mind. Special features make installation and configuration simple and allow you to customize the application to your needs.

## Industrial Applications

The DCS800 can be used in a wide range of industrial applications including:

- Metals
- Electrolysis
- Pulp & Paper
- Ski lifts
- Printing
- Magnets
- Material handling
- Food & Beverage
- Battery Chargers
- Test rigs
- Plastic & Rubber
- Mining

## DCS800 DC Drive Promises

The drive meets the requirements of the most demanding drive applications. Embedded software functions offer upgrades to all classic installations like 12-pulse, double motor operation, and field reversal.

## Highlights

- Reduced installation and commissioning work
- Internal three phase field power supply without additional external hardware (D1-D5)
- Excellent control performance up to highest dynamic application in field weakening operation
- All ACS800 PC tools (via DDCS) can be connected
- Able to be customized to your needs with Adaptive Programming and with option Control Builder
- Flexible fieldbus system with numerous internally mountable fieldbus adapters
- Virtually all DCS800 component parts are suitable for recycling.
- Coated circuit boards as standard

## PC Tool for ABB Drives

DriveWindow Light is an easy-to-use tool for your PC for start up and maintenance of your ABB drive. It is included with every DCS800 drive and has the following features:

- User interface tool to view and set parameters
- Startup Assistant tool
- Adaptive Programming (AP) tool

It supports a wide range of ABB industrial drives, including ACS350, ACS550, ACS800, as well as the DCS800.

## Main Features

- Basic control
  - Transducer and transducerless operation
  - Macros to simplify setup
  - High-speed serial via Ethernet, ControlNet, etc.
  - On/Off control with pulsed or maintained inputs
  - Field heating
  - Adaptive Programming
  - Remembers two sets of motor parameters
  - Drive position display
  - Save parameter set to PC or keypad
- Motor Control
  - Easily switches between local control via keypad and remote control via digital I/O or high-speed network
  - Window speed control
  - Flying start
  - Field reversal, boost and opti-torque
  - Motor pot up and down control
- Drive Configurations
  - Stand-alone
  - Master-follower (up to 10 followers)
  - 12-pulse operation
  - Hard-parallel operation (D7 only)
- Inputs and outputs
  - All user-designated inputs and outputs
  - Relay output for AC or DC contactor control
  - Motor brake control, including torque proving input
  - Motor temperature sensor monitoring
  - High speed DC breaker monitoring
- Faults and Diagnostics
  - Fault logging with time and date stamp
  - Diagnostic assistant activates when fault occurs

### Option codes

Letter code followed by 3 digit number (see option code page)  
 Example: +S164 = Internal field power supply; +S171 = 120 VAC fan

# DCS800-S0, industrial drives

## Data sheet

### 10 thru 4000 HP 230 to 990 VAC 3 Phase - 50/60 Hz

Input ratings	Input Voltage range	230 VAC through 990 VAC; 1190 VAC available upon request
	Input Voltage tolerance	±10% continuous; ±15% up to 0.5 sec.
	Phase	3 Phase
	Frequency	50 Hz ±2%, 60 Hz ±2%
	Short circuit rating (UL 508a)	65,000 rms symmetrical Amperes through D4; 100,000 rms symmetrical Amperes D5 through D7
Output ratings	Horsepower	5-250 HP @ 230 VAC; 10-3000 HP @ 460 VAC; 200-3250 @ 600 VAC; 700-4000 @ 690 VAC
	Normal duty overload	110% for 60 seconds every 10 minutes
	Standard duty overload	150% for 30 seconds every 15 minutes
	Heavy duty overload	150% for 60 seconds every 15 minutes
	Motor types	DC wound-field motors, DC series-wound motors
	Accel/decel	0.01 to 30,000 sec
Control Power Connection	Input Voltage	115 VAC or 230 VAC auto sensing, 45 - 65 Hz.
	Power consumption	120 VA
Motor armature	Output Voltage	2Q (S01): 0 to 1.15 * input voltage; 4Q (S02): 0 to 1.03 * input voltage
	Current	See rating tables or <i>DCS800 Hardware Manual</i>
Motor field	Type	D1 - D4: Internal, current controlled, full wave half controlled thyristor/diode bridge; D5 - D7: External, see <i>DCS800 Hardware Manual</i>
	Input Voltage	D1 - D4: 3 phase, internally fused (shares armature line power)
	Output Voltage	D1 - D4: 0 to 1.35 x Input Voltage
	Output current	D1: 0.3 to 6 A; D2: 0.3 to 15 A; D3: 0.3 to 20 A; D4: 0.3 to 25 A
Protective features	Armature overvoltage	Armature Voltage exceeds limit
	Armature overcurrent	Armature current exceeds limit
	Armature current rise maximum	Change in armature current exceeds limit
	Field undercurrent	Field current below minimum limit
	Field overcurrent	Field current exceeds limit
	Motor thermal protection	Actual or estimated motor temperature exceeds limit
	External fault & alarm	Rising or falling edge of digital input triggers alarm or fault
	Speed feedback monitor	Compares actual speed to speed measured by motor EMF
	Motor overspeed	Motor speed exceeds limit
	Current ripple	Amplitude of AC current component of DC armature current exceeds limit
	Input Voltage monitor	Line voltage above or below normal range
	Local control loss (panel loss)	Loss of signal from control panel while panel is speed reference
	Communication control loss	Loss of signal from fieldbus (e.g., Ethernet IP) while fieldbus is speed reference
Environmental	Temperature	0° to 40° C (32° to 104° F); 0° to 55° C (32° to 132° F) w/ derate
	Cooling	Forced air
	Enclosure	UL Type Open (IP00)
	Altitude	Sea level to 3300 ft (1000m); up to 6600 ft (2000m) derate 1% per 330 ft (100m); up to 10,000 ft (3000m) contact ABB
	Humidity	5% to 95% RH non-condensing down to 5°C; 5% to 50% RH non-condensing 0° to 5° C
	Vibration	D1 - D4: 1.5mm @ 2 to 9 Hz, 0.5g @ 9 to 200 Hz; D5-D7: 0.3mm @ 2 to 9Hz, 0.1g @ 9 to 200Hz
	Shock	D1 - D4: 7 g / 22 msec; D5 - D7: 4 g / 22 msec

# DCS800-S0, industrial drives

## Data sheet

<b>Speed feedback / accuracy</b>	Speed resolution	With encoder 0.005% of nominal speed; with analog tach 0.1% (16 bits)
	Cycle time, speed and current controller	2.77 msec at 60 Hz, 3.33 msec at 50 Hz
	Step response, current controller	5 msec
	Speed feedback	EMF (transducerless), analog tach, encoder, 2nd encoder with RTAC, Resolver with RRIA-01 or FEN-21
	Analog tach Voltage	±8-30 Vdc, ±30-90 Vdc, ±90-270 Vdc
	Pulse encoder Voltage	5, 12, 15, 24 Vdc
<b>Analog inputs</b>	AI1 & AI2 Voltage config	-10 Vdc to +10 Vdc, Input Resistance RI = 200 kOhms
	AI1 & AI2 current config	0 to 20 mA, Input Resistance RI = 250 Ohms
	AI3 & AI4 Voltage only	-10 Vdc to +10 Vdc, Input Resistance RI = 200 kOhms
	Common mode range	±15 V
	Resolution	15 bit + sign bit
<b>Analog outputs</b>	Input update time	AI1 & AI2 = 2.8 msec; AI3 & AI4 = 5 msec
	Two (2) programmable Voltage	-10 Vdc to +10 Vdc, maximum load of 5 mA
	One (1) dedicated armature current output	4 Vdc = 325% of rated motor current entered in Parm 99.03
	Resolution	11 bit + sign bit
	Output update time	5 msec
<b>Digital inputs</b>	Eight (8) digital inputs	24 Vdc, (-15%) to max of 48 Vdc
	Logical switch thresholds	Below 7.3 Vdc = status "0"; above 7.5 Vdc = status "1"
	Input current	5 mA
	Filter time constant	2 msec
	Input update time	DI1 to DI6 = 5 msec, DI7 & DI8 = 2.8 msec
	Internal 24 Vdc for digital inputs	24 Vdc, 125 mA, short circuit proof; external 24 Vdc allowed
<b>Digital outputs</b>	Seven (7) Digital Outputs	Transistor for signal driving only
	Signal level	Status 1 = 22 Vdc at no load
	Output updating time	2.8 msec
<b>Relay output</b>	One (1) relay output	Normally open (NO) factory set for AC line contactor control
	Maximum switching current	3 A at 24 Vdc or 115/230 Vac; 0.3 A at 120 Vdc
	Isolation test voltage	4 kVac, 1 minute
	Output updating time	2.8 msec
<b>Digital encoder</b>	Encoder Voltage supply	5 Vdc @ 250 mA max; 24 Vdc @ 200 mA max (default is 5 Vdc selected via S4 jumper)
	Encoder mode	Single ended or differential (default is differential selected via S4 jumper)
	Pulse encoder voltage	5Vdc or 24 Vdc; 12 Vdc with IOB-3; 15 Vdc with RTAC-01
	Maximum input frequency	300 kHz
<b>Fuse protection</b>	AC line	D1 - D4: External semiconductor fuses required (3); See ratings table in DCS800 Hardware Manual D5 - D7: Internal semiconductor fuses included
	DC load (4Q S02 only)	(2) semiconductor fuses; see ratings table in DCS800 Hardware Manual
<b>Input impedance</b>	Line reactor or isolation transformer	Customer-supplied 1.5 to 10 pct impedance required; See DCS800 Hardware Manual

DCS800-S01-5200-05RB	4243	4820	3000	3972	2500	3800	2250	D7	\$83,163

### Notes:

Note 1: The ratings apply at an ambient temperature of 40 °C (104 °F).

Note 2: 2-quadrant drives CANNOT decelerate a load or power motors in the reverse direction

Note 3: The DCS800 drive requires a line reactor or isolation transformer

Note 4: Frame D6 drives do not include busbar tabs for the power connection. There are five - 4 hole lug terminals on the side of the drive unit (3 for AC, 2 for DC). If busbar tabs are required, they must be ordered separately. See "Power and safety options" for ordering information.

Note 5: Frame D6 and D7 do not include field supplies. A field supply is required for most DC motor applications. See "Field Supplies" section for selection and ordering information. Note 6: In Frame D7, the 'L' is for left-hand bus arrangement and the 'R' is for right-hand bus arrangement.

Note 7: Plus code +S171 is to specify fan voltage of 120 Vac for the D4 drives. Remove +S171 for 240 Vac fan voltage (special order).

Note 8: Plus code +S164 is to specify an internal field supply for the D4+ and the D5 drives. D4+ requires external field fuses, D5 does not.

\* UL Listing is pending. Continuous ratings is 1190  $A_{dc}$  at 35°C; 1140  $A_{dc}$  at 40°C

### Definitions:

$I_l$	Continuous rms input current for any duty cycle
$I_{nd}$	Continuous dc output current (normal duty) allowing 10% overload for 1 minute every 10 minutes
$P_{nd}$	Typical motor power in normal duty use
$I_{sd}$	Continuous dc output current (standard duty) allowing 50% overload for 1/2 minute every 15 minutes
$P_{sd}$	Typical motor power in standard duty use
$I_{hd}$	Continuous dc output current (heavy duty) allowing 50% overload for 1 minute every 15 minutes
$P_{hd}$	Typical motor power in heavy duty use
